

# Do You Need Help Educating Your School about Food Allergies and Anaphylaxis?

Your entire school community needs to be ready.

Education and awareness for  
staff, parents and students  
is critical in keeping  
students with food allergies  
safe and happy.

Teach the pillars of food allergy management  
Prevention and Emergency Preparedness.

Schools.AllergyHome.org has free resources to help school nurses create  
communities of support and educate staff, students, and parents.

**Prevention**

**Emergency  
Preparedness**

A screenshot of a website titled 'Food Allergy Education Table'. It features a table with columns for 'Grade Level', 'Allergens', 'Prevention', and 'Emergency'. The table lists various allergens and their management strategies for different grade levels from Kindergarten to High School. A search bar and navigation links are visible at the top.

## Staff Training: Food Allergies & Anaphylaxis in School What School Staff Need to Know

[AllergyHome.org/stafftraining](http://AllergyHome.org/stafftraining)

This free, online, 30 minute module is designed to assist the school nurse in food allergy and anaphylaxis training for all school staff. The staff training module has been reviewed by national organizations and experts, and is consistent with CDC's Voluntary Guidelines for Managing Food Allergies in Schools and Early Care and Education Programs.

An accompanying quiz emphasizes major points of food allergy management. A certificate of completion is available to be printed or emailed after passing the exam. Nurses can track which staff have completed the training by collection of these certificates.
